Disclaimer
As organizers of RuleML-2007 we are making every effort to make it an enlightening and enjoyable experience for participants. However, we can not take responsibility for any damage, loss or inconvenience participants might incur in connection with the symposium. In addition, the organizers can not be held responsible for the correctness or appropriateness of the talks, papers, panels, tutorials and demonstrations included in the symposium. In particular, changes to the published symposium program or cancellation of parts thereof do not entitle participants to a full or partial refund of the symposium fee.

Any personal/business information supplied to the symposium will be used by the symposium organization for the purposes of symposium registration and administration. Names and addresses of attendees will be processed electronically and included in a list of participants that may be posted and/or distributed during and in connection with the symposium. In addition, this information may also be made available for purposes beneficial to the scientific community such as informing attendees of relevant related publications, events, or items of interest to the community. By registering for the symposium, participants give their consent for such uses of their personal/business information.

Additional Help & Information
If you need help with registration, hotel, tours, etc. and when the symposium registration desk is closed, please contact the RuleML-2007 organizers.

E-mail: ruleML2007@easychair.org
Welcome to RULEML-2007

Welcome to the International Symposium on Rule Interchange and Applications (RuleML-2007) organized by the RuleML initiative, and welcome to Orlando, Florida. We are delighted to provide the venue and facilities for what we hope will be a stimulating and successful event. RuleML-2007 is the first primary symposium devoted to work on practical distributed rule technologies and rule-based applications. The symposium theme for 2007 will be „Rule Interchange and Applications“.

After a series of successful RuleML workshops and then conferences the RuleML-2007 is a new kind of event where the Web Logic community joins the established, practically oriented Forum of the Business Rules community to help cross-fertilizing between Web and Business Logic technology. The goal of RuleML-2007 is to bring together rule system providers, representatives of, and participants in, rule standardization efforts and open source rules communities, practitioners and technical experts, developers, users, and researchers, who attended an exciting venue to exchange new ideas, practical developments and experiences on issues related to the engineering, management, integration, interoperability and interchange of rules in open distributed environments such as the Web.

This year from 41 submitted papers nine full papers, which presented solid work in advancing and assessing the state of the art in rule-based systems, including event processing systems; two invited papers accompanying keynotes; nine short papers, which presented innovative ideas, approaches, and implementations; and three demo papers accompanying the 10 demo presentations of practical applications at the RuleML-2007 Challenge session were selected for the final program. The symposium opens on 25th October with its regular program and closes on the evening of 26th October. In several keynote talks renowned speakers give presentations about „up-to-date“ topics that pose challenges to industry, technology development and research:
1. Ron Ross (BRCommunity): “Business Requirements for Rule Modeling”
2. Jürgen Angele (Ontoprise): “How Ontologies and Rules Help to Advance Automobile Development”

The program also includes a panel discussion on “Web Business Rules” featuring prominent and visionary speakers: and a Challenge with prestigious prices. An excellent technical program is a prerequisite for interaction and communication, but it does not suffice unless accompanied by ample opportunities for social encounter such as the breakfasts, the lunches, and social events to promote networking among the symposium delegates in an informal setting. In addition there will be a general open RuleML meeting on Thursday evening and a closing session on Friday evening which will provide an excellent chance for exchanges of ideas on specific topics and planning of future collaborations. Over the next few days, we hope that everyone participating in the symposium will expand their knowledge and will find useful resources to help with their ongoing work. Most importantly, we hope that by the end of the symposium everyone will have found new friends and partners with whom to work towards new research achievements.

Said Tabet      Adrian Paschke     Yevgen Biletskiy
General Chair    Program Co-Chair                       Program Co-Chair

Symposium Officers and Program Committee Members

General Chair
Said Tabet, Inferware Corp., USA
stabet@ruleml.org

Program Co-Chairs
Adrian Paschke, Technical University Munich, Germany
paschke@in.tum.de

Yevgen Biletskiy, University of New Brunswick, Canada
biletski@unb.ca

Challenge Co-Chairs
Alexander Kozlenkov, Betfair Ltd., London, UK
alex.kozlenkov@betfair.com

Ralph Hodgson, TopQuadrant, Inc., Mountain View, USA
rhodgson@topquadrant.com

Panel Chair
John Hall, Model Systems, UK
john.hall@modelsys.com

Publicity Chair
Suzette Stoutenburg, MITRE Corporation, USA
suzette@mitre.org

Program Committee Members:
- Asaf Adi, IBM Research Laboratory Haifa, Israel
- Bill Andersen, Ontology Works, USA
- Grigoris Antoniou, University of Crete, Greece
- Arun Ayash, IBM TJ Watson Research Center, USA
- Youcef Baghdadi, Sultan Qaboos University, Oman
- Sidney Bailin, Knowledge Evolution, USA
- Claudia Bartolini, HP Labs Palo Alto, USA
- Tim Bass, SilkRoad Inc., USA
- Nick Bassiliades, Aristotle University of Thessaloniki, Greece
- Borja Bernal, University of Augsburg, Germany
- Leopoldo Bertossi, Carleton University, Canada
- Anthony Brown, University of New Brunswick, Canada
- Loreto Bravo, University of Edinburgh, UK
- Diego Calvanese, Free University of Bozen-Bolzano, Italy
- Donald Chapin, Business Semantics Ltd, UK
- Keith Clark, Imperial College, UK
- Jorge Cuellar, Siemens AG, Germany
- Mike Dean, BBN Technologies, USA
- Stan Devitt, Agfa Healthcare, Canada
- Jens Dietrich, Massey University, New Zealand
- Juergen Dix, Technische Universitaet Clausthal, Germany
- Scharam Dustdar, Vienna University of Technology, Austria
- Andreas Eberhart, HP, Germany
- Maarten van Emden, University of Victoria, Canada
- Opher Etzion, IBM Research Laboratory Haifa, Israel
- Dieter Fensel, DERT Innsbruck, Austria
- Tim Finin, University of Maryland Baltimore County, USA
- Dragan Gasevic, Athabasca University, Canada
- Allen Ginsberg, MITRE, USA
The RuleML Initiative

The RuleML Initiative is organised by representatives from academia, industry and government for promotion of the modern and future generations of rule technology, which provides enhanced usability, scalability and performance. The goal of RuleML (www.ruleml.org) is to be a general and open intermediary between various “specialized” rule vendors, applications, industrial and research working groups and standardization efforts such as OMG PRR or W3C RIF. A general advantage of using declarative rules is that they are usually represented in a machine-readable and platform-independent manner, often using XML. This fits well into today’s distributed, heterogeneous Web-based system environments. Rules represented in standardized Web formats can be discovered, interchanged and invoked at runtime within and across Web systems, and can be interpreted and executed on any platform.
General Symposium Information

Conference venue and registration  RuleML-2007 is co-located with the Business Rules Forum and takes place in:

Buena Vista Palace
1900 Buena Vista Drive
Lake Buena Vista, FL 32830
Toll-Free: 1-866-397-6516
Tel: (407) 827-2727  Fax: (407) 827-6070
http://www.buenavistapalace.com/

The symposium registration will take place on October, 25th 7 am – 4 pm and on October, 26th 7-8.30 am.

Finding your way  From the north end of the airport, take SR-528 (Beeline Expressway toll road) heading west. Merge onto I-4 West. From I-4, take Exit #68, then turn right onto SR-535. Turn left onto Hotel Plaza Boulevard, then right onto E. Buena Vista Drive. Hotel is on the right.

Help and Support  If you need help or additional information during the symposium please contact one of the RuleML organizers

Bank, exchange and credit cards  Facilities for cashing traveller’s cheques are available at banks and at most hotels. Throughout the city there are numerous ATMs available. Most credit cards are accepted in USA.

Phone country code for USA is ++1.

Electricity  The voltage/frequency in USA is AC 110 volts / 60 Hz with a plug of two pins set parallel to each other. Non US participants need a plug adapter for electrical appliances.

Time  Orlando is located in the Eastern Time Zone. In summer the Summer Daylight-Saving Time is in effect:  EDT UTC/GMT -4 hours

Information for Chairing Sessions

Introduce yourself to your presenters and remind them to give you their short biography. Before the first speaker is scheduled to begin, introduce the session, introduce yourself and any co-chairs or assistants, make any announcements, and state the session rules. These are generally: (1) Every talk is allotted a total of 30 minutes (15 minutes for short papers), typically 25 minutes of presentation and 5 minutes for questions. (2) Every talk needs to end on time. (3) The chair will signal the speaker when 6 minutes are left (= 1 minute of speaking time) and 1 minute is left of the 30 minute slot

Introduce your presenters using the biography they have given you.

In general, please allow the audience to ask questions first before you do. Have a look at the papers in your session and prepare for the discussion.

Information For Presenters

Presentation time is:
- full paper 30 minutes (25 min. presentation + 5 min. Q&A)
- short paper 15 minutes (10 min. presentation + 5 min. Q&A)
- demo 12 minutes (7 min. demo + 5 min. Q&A)

You can present using your own laptop or bring a CD / USB “memory stick”. Copy your file to the hard drive. Presentation format:
- Full/Short paper: MS Powerpoint.
- Demo: preferably a live (online) demo

Biography. Please write a short biography for the chair to use to introduce you. (We suggest 4-6 lines, preferably typed or in block letters).

Arrive at the room where your session is being held about 15 minutes before the session

Earlier during the symposium, if possible, please go to the room in which you will be presenting in order to copy your presentation files onto the symposium laptop computer. Test it to make sure it runs as expected.

Please be considerate to the other speakers: keep to the allowed time.

Opening Address: Business Requirements for Rule Modeling
Thursday, October 25, 2007, 8 – 8.30 am

Ron Ross
Co-Founder and Principal of Business Rule Solutions, LLC and Executive Director of BRCommunity

About the speaker

Keynote 2: How Ontologies and Rules Help to Advance Automobile Development
Thursday, October 25, 2007, 1:45 – 2:45 pm

Jürgen Angele
CTO Ontoprise

Abstract

Besides the reduction of time-to-market, another trend may be observed in the automotive industry: built-to-order. Built-to-order reduces the mass production of cars to a limited-lot production. Emphasis for optimization issues then moves from the production step to earlier steps like the collaboration of suppliers and manufacturer in development and delivery. Thus, relevant knowledge has to be shared between different organizations and departments in early development processes. In the talk we describe an application in the automotive industry where ontologies have two main purposes:
(i) representing and sharing knowledge to optimize business processes for the development of cars; in our case the testing of electronic control units and (ii) integration of live data into this process.
A system is built on top of an inference engine equipped with an ontology containing information about parts, their mutual interrelationships and their behavior. In many cases this knowledge is described by rules. This formal representation can then be compared with a concrete real car or part of a car. This system accelerates the development of cars and their parts, and in this way also reduces time-to-market.

About the speaker

Prof. Dr. Jürgen Angele is currently CTO and shareholder of Ontoprise GmbH, a provider of semantic technologies. Ontoprise has been cofounded by him in 1999. In 1994 he became a full professor in applied computer science at the University of Applied Sciences, Braunschweig, Germany. From 1989 to 1994 he was a research and teaching assistant at the University of Karlsruhe, Institute AIFB. He did research on the execution of the knowledge acquisition and representation language KARL, which led to a Ph.D. (Dr. rer. pol.) from the University of Karlsruhe in 1993. From 1985 to 1989 he worked for the companies AEG, Konstanz, Germany, and SEMA GROUP, Ulm, Germany. He received the diploma degree in computer science in 1985 from the University of Karlsruhe. He published around 90 papers as books and journal, book, conference, and workshop contributions. Topics were about semantic web, semantic technologies, knowledge representation, and their practical applications. He is leading several research and commercial projects. He gave more than 55 courses at Berufsakademien, Fachhochschulen and Universities. Topics were about: Expert Systems, Software Engineering, World Wide Web, Database Systems, Digital Image Analysis, Computer Graphics, Mathematics. He supervised around 30 master theses and Ph.Ds.
Keynote 3: How Ontologies and Rules Help to Advance Automobile Development
Friday, October 26, 2007, 8:30 – 10:00 pm

Adrian Bowles
OMG Program Director for the Governance, Risk Management and Compliance Roundtable (GRC-RT) and Managing Director of CoSource.net

Abstract

Corporate governance makes headlines, but IT governance is critical for business growth. A new collaborative project is being launched within the GRC Roundtable <www.grcroundtable.org> to improve IT governance by developing a common set of rules for IT policy management. These rules, which will map to control and security frameworks such as COBIT and ISO17799, may come from existing projects written in any language, or they may be created by the group to meet specific requirements. Participating firms will share the development costs, risk, and benefits of integrating them into a comprehensive, general purpose set. This presentation will address the challenges and opportunities created by sharing such a rule-based IT governance infrastructure.

About the speaker

Adrian Bowles is Program Director for the Governance, Risk Management and Compliance Roundtable (GRC-RT) and Managing Director of CoSource.net. Dr. Bowles has over 25 years of experience as an entrepreneur, practitioner and academic in information technology with a focus on IT strategy and management. Previously, he held senior research and management positions at the IT Compliance Institute, Giga Information Group, Atelier Research, New Science Associates, and Yourdon, Inc. Dr. Bowles also held development roles at IBM Corp. and GTE Laboratories, and academic appointments at New York University, Drexel University and the State University of New York at Binghamton.

Bowles earned his BA in Psychology and MS in Computer Science from SUNY Binghamton, and his Ph.D. in Computer Science from Northwestern University.

Keynote 4: Are Your Rules Online? Four Web Rule Essentials
Friday, October 26, 2007, 4 – 5 pm

Harold Boley
Leader of the Semantic Web Laboratory at NRC IIT

Abstract

Four principal Web rule issues constitute our starting points: I) Formal knowledge representation can act as content in its own right and/or as metadata for content. II) Knowledge on the open Web is typically inconsistent but closed 'intranet' reasoning can exploit local consistency. III) Scalability of reasoning calls for representation layering on top of quite inexpressive languages. IV) Rule representation should stay compatible with relevant Web standards.

To address these, four corresponding essentials of Web rules have emerged: E1) Combine formal and informal knowledge in a Rule Wiki, where the formal parts can be taken as code (or as metadata) for the informal parts, and the informal parts as documentation (or as content) for the formal parts. This can be supported by tools for Controlled Natural Language: mapping a subset of, e.g., English into rules and back. E2) Represent distributed knowledge via a module construct, supporting local consistency, permitting scoped negation as failure, and reducing the search space of scoped queries. Modules are embedded into an ‘Entails’ element: prove whether a query is entailed by a module. E3) Develop a dual layering of assertional and terminological knowledge as well as URIs vs. URNs, for naming. A URI can then be used: URL-like, for module import, where it is an error if dereferencing does not yield a valid knowledge document; URN-like, as an identifier, where dereferencing is not intended; or, as a name whose dereferencing can access its (partial) definition.

About the speaker

Dr. Harold Boley is leader of the Semantic Web Laboratory at NRC IIT and Adjunct Professor at the Faculty of Computer Science, University of New Brunswick, Fredericton, Canada. He developed the Relational-Functional Markup Language before starting and co-leading the Rule Markup (RuleML) Initiative. He co-designed the Semantic Web Rule Language (SWRL), which combines the W3C-recommended Web Ontology Language OWL and RuleML. He led the design of a First-Order Logic Web language (FOL RuleML) and contributed to the design of the Semantic Web Services Language (SWSL). He is co-editor of the W3C Rule Interchange Format (RIF). His focus is on Semantic Web knowledge representation combining ontologies and rules. He is currently exploring this for person/organization-centric profiles supporting FOAF-extending social networking and expert finding, as realized, e.g., with RuleML FOAF in FindXpRT and Rule Responder.
Events Associated With RULEML-2007

As a registered attendee of the International RuleML-2007 Symposium, the 10th Business Rules Forum - co-located at the Buena Vista Palace Hotel & Spa - would like to extend to you a COMPLIMENTARY admission to RulesExpo, the world's largest exposition of rule vendors and solution providers.

Your complimentary admission is valid for the RulesExpo session on Wednesday, October 24, from 5:00 pm to 6:30 pm.

Please pick up your credentials at the Business Rules Forum registration desk.

RuleML-2007 General Open Meeting (open to the public)
Thursday, October 25th at 5.40 - 6.40 pm

Symposium Dinner
Thursday, October 25th at 7.15 pm
Location: Nearby restaurant – will be announced during the symposium

RuleML Steering Committee Meeting (by invitation)
Friday, October 26th starting at 6.00 pm

Information For Your Visit to Orlando

LOCAL ATTRACTIONS  Don't miss this opportunity to visit some of the local attractions including Walt Disney World®, Epcot®, Kennedy Space Center, Sea World, Universal Studios Florida, the Bob Carr Performing Arts Center and much more

DINING  With hundreds of restaurants within Orlando and surrounding areas including hundreds of top notch eateries within walking distance of the Symposium — it won't take you long to quench your thirst or satisfy even the most discerning diners.

What's going on in Orlando?  Check out what's happening in Orlando, FL at OrlandoInfo.com: the Official Site of the Orlando/Orange County Visitors Bureau.
